

NIGERIA'S FIRST CONTENT MODERATION SUMMIT

Content Moderation Summit

At a Glance

API hosted a summit that convened key stakeholders in Nigeria's digital space, to discuss approaches for online harms protection.

Result(s)

API organised Nigeria's first content moderation summit

KEY ISSUES

Following the ban imposed on social networking site, Twitter, by the Nigerian Government from 2021 to 2022, API intelligence tracker and in-house research highlighted that the absence of clear, concise, and accepted framework for digital rights gives room for confusion and incoherence, which may result in arbitrary actions that malign citizens.

OUR APPROACH

API hosted a summit themed "The Challenge for Content Moderation and the Opportunity to Improve Online Safety in Nigeria" as part of a series of knowledge events to provide ample context on comparative approaches for developing a people-oriented and fit-for-purpose framework to protect Nigerians Online.

Summit

Stakeholder Engagement

OUTCOME

1

Nigeria's First Content Moderation Summit

Nigeria's first content moderation summit was organised.

2

Stakeholder Engagement

The summit convened relevant players including private and public sector stakeholders in Nigeria's digital landscape. The key insights shared at the event have served as a foundation for subsequent efforts towards online harms protection.
